

Fast-track your business to net zero with 100% renewable electricity

SmartestEnergy offer a range of certified renewable electricity products for large businesses considering the next step on their net zero journey.

Renewable Standard

Confidently report zero carbon emissions from a blend of renewable sources with our Renewable Standard product

Most suitable for businesses...

- Taking initial steps to reduce their carbon footprint
- Supplying multiple or high-consumption sites for a minimum of 1 year
- Actively and transparently demonstrating their commitment to net-zero

Renewable Standard generation sources:

Wind, solar, water, thermal and anaerobic digestion

Renewable Natural

Our Renewable Natural product enables you to power your business with energy sourced from 'natural' generation wind, sun and water

Most suitable for businesses...

- Seeking natural renewable energy to power their business
- Committing to net zero carbon targets as part of their sustainability roadmap
- Supplying multiple high-consumption option sites for a minimum of 1 year
- Wanting to show their support of existing and new renewable generation projects

Renewable Natural generation sources:

Wind, sun and water

Renewable Specific

This bespoke product allows you to specify the source of your power and provides an opportunity to showcase your support of specific UK renewables projects

Most suitable for businesses...

- With the need for a bespoke UK renewable electricity supply arrangement, from a specific technology type or region
- Supplying specific offices or sites for a minimum of 1 year
- Wanting to communicate the specific name, location and technology type of generation sites they source their power from
- Requiring the display of the Carbon Trust certification label on their company-level Energy Label

Renewable Specific generation source:

UK generators that meet your exact supply requirements

Corporate PPA

Partner with an independent renewable generator on a Corporate PPA to help get a new renewable project added to the UK network

Most suitable for businesses...

- With an innovative approach to reducing their carbon footprint
- Requiring a direct link to a new renewable generation project and long-term energy price certainty
- Wanting to be known for their role in accelerating carbon reduction and combating climate change
- Making a long-term commitment of 5+ years for specific offices or sites
- Requiring the display of the Carbon Trust certification label on their company-level Energy Label

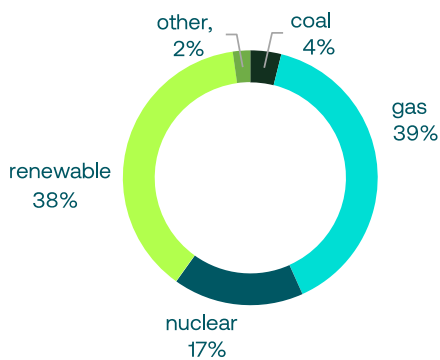

Corporate PPA generation source:

A UK generator of any natural renewable type

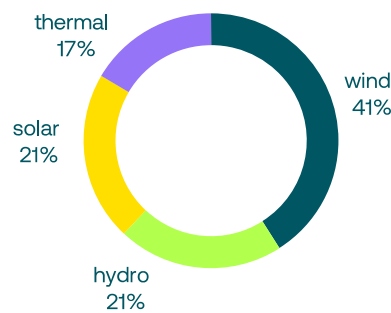

Our renewable product fuel mixes

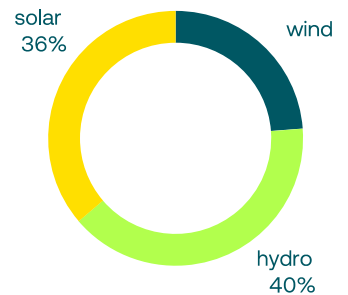

UK Average Fuel Mix

Renewable Standard

Renewable Natural

- Showcase your Carbon Trust-certified electricity supply fuel mix by proudly displaying your **Renewable Commitment** Certificate on signing a renewable contract with us.
- Report with certainty by evidencing your confirmed actuals with our annual Energy Label (including a clear view of your actual energy consumption and related GHG Protocol Scope 2 emissions).

All our renewable products are **independently certified by the Carbon Trust**, providing unrivalled transparency*

Confidently report zero carbon emissions using the market-based method (GHG Protocol Scope 2)

*100% of the electricity supplied is renewable, backed by certificates of renewable energy guarantees of origin. Emission factors are compliant with the GHG Protocol Scope 2 Guidance and are to be used for the 'market-based method'.
