

Flexible Power Purchase Agreement

The UK energy system is changing at rapid pace, providing generators with more market opportunities to maximise the value of their projects. Our Flexible PPA gives generators control over how and when power is sold onto the wholesale market. Transact instantly with our experienced hedging team to sell monthly or seasonal blocks of volume as market opportunities arise.

Maximise your revenue by selling your power across multiple transactions

Access the full liquid market to trade blocks of electricity for future generation in line with your risk strategy and market movements

Track and react to the market for control over the price you sell your electricity

Lock in volume at quoted market prices or against published indices, with the ability to unlock as well as lock to react to price changes

Maximise value from your asset through online price information and reporting

Monitor your hedged position, carry out 'what if' trades, and report day +1 generation performance data using our online portals

About us

SmartestEnergy is the forward-thinking energy supplier helping businesses navigate the new energy landscape. Established since 2001, we're a stable, well-resourced business with an independent voice to recommend what's best for our customers. We create flexible, commercially-minded solutions to help you get the best returns on your project. If you would like to know more about how our Flexible PPA product could work for you, please get in touch with our team.

Supplement your power income with additional revenues

- > Choose your preferred pricing structure for Renewable Obligation Certificates (ROCs)
- > Embedded benefits can be passed through at fixed % for a transparent price
- > Gain additional income by generating during Triad periods with help from our alert service
- > We buy Renewable Energy Guarantee of Origin (REGO) certificates to evidence our certified 100% renewable electricity supplied to sustainable UK businesses

Create a power strategy with fast and reliable payment terms

- > A simple single rate price for your power, with the option to lock and unlock your volume so you can react to price changes
- > Take the option of multiple markets and indices available to sell your power instead of forward hedging
- > 20 day payment terms as part of our simple billing process
- > No volume tolerance or imbalance charges as standard - we take responsibility for balancing your output

Proven partner of generators

- > Leading purchaser of independent generation in the UK - 19% share of renewable independent distributed market
- > Dedicated Account Manager and named Customer Service Executive
- > Shared expertise including weekly industry news, guidance on topical issues, plus quarterly forecasts of revenue streams
- > Over 3GW PPA portfolio with proven bankability since 2001

Contract features at a glance

- > Flexibly sell power up to 36 months into the future
- > Sell power on multiple markets/indices in blocks of 0.2MW and above (to increments of 0.01MW)
